

FAIZAN.

SAFETY (PVT) LTD

INTRODUCTION

FAIZAN SAFETY (PVT) LTD. was Established in 2006. Due to our vast manufacturing experience we are proud to represent ourselves as world renowned supplier of Thirsty Cotton, Modal, Zero Twist, and Organically treated combed cotton towels. We offer custom woven jacquard, embroidered, printed, yarn dyed, and plain towels.

Over the years, FAIZAN SAFETY (PVT) LTD. has grown from a specialist in Cotton Gloves to a provider of a full line of Work Gloves. Quality is assured by our ISO 9001:2000 system with increasingly stringent control on specification, testing and inspection.

WHY US?

As one of the leading terry exporters in Pakistan, we service the institutional sector with all the major hospitals and hotels in various countries.

We specialize in manufacturing towels and take pride in our state-of-the-art Sulzer G6100 terry towel looms with Staubli Jacquard 2688 hooks. Our dying unit with Vision and Fongs machines, Thies Tumber dryer, and complete stitching unit allows us to create high-quality, durable towels that meet our customers' demands.

FAIZAN SAFETY BUSINESS UNITS

TOWEL MANUFACTURING

We are producing best quality product of terry towel and different kind of towels like bath towel, kitchen towel, beach towel, hand towel etc. We have in house weaving, cutting and stitching unit. Commercial dyeing process.

IN HOUSE STICTHING UNIT

With over 200 stitching machines, manned with the most skilled and expert operators. The Quality control and Quality Assurance departments are in place to make sure the company's objective of zero defects. Bar coding and Back Track system provide FAIZAN SAFETY (PVT) LTD 100% predictability and tracking performance.

COMMERCIAL KNTTING

Knitting Department machines capable of making Jersey, Pique, Fleece, Interlock and Rib. The gauge ranges from 9 to 28 for single jersey, 18 to 28 for Interlock and 15 for Ribmachine. Most of the machines are equipped with Lycra attachment. 100% production is inspected and only 'A' grade fabric is transferred to the subsequent operations.

COMMERCIAL DYEING & PROCESSING

The Processing Department has an installed capacity of dyeing over 2,000 lbs per day. It is capable of dyeing both 100 % cotton and Poly- cotton blended fabrics. The department has Santex finishing lines including hydro extractor, dryer and compactors for tubular as well as open width fabrics.

TOWEL JACQUARD WEAVING

Our weaving section comprises of 90 shuttle less looms in house & 120 shuttle less looms in our sister concerns in widths 130" & 153" with the total capacity to produce 10 million meters of fabric/year.
